

## American Electric Power Foundation

The American Electric Power Foundation complements a tradition of corporate philanthropy exhibited by American Electric Power and its regional utilities, including Appalachian Power. The Foundation's giving is centered around AEP's community relations goal: "To support and play an active, positive role in the communities where we live and work." The American Electric Power Full STEAM Ahead program at WVSU has provided scholarships and research opportunities to undergraduate students and expanded the University's capacity for research in bioenergy and outreach to public school children. This year, a generous new commitment from the AEP Foundation is making possible the establishment of a chemical engineering laboratory in support of WVSU's new chemical engineering program.
